

BULL SALE

November 21ST 2020 • 1PM (cst)

At the Ranch

Selling: 32 Coming 2 year old bulls

Featuring Sons and Grandsons of: Roughrider • Revolver • Nine Iron

Welcome to our sale...

Welcome to YellowTop Angus! We are looking forward to hosting our 3rd annual sale here at the ranch! I am very excited to offer this set of bulls for sale on November 21st. From top to bottom they are good. This is the most consistent set of bulls we have ever raised. I have been trying to write footnotes on these bulls and it is hard because I may sound like a broken record saying this bull is well balanced, has good length, above average muscling and has a great disposition, but it's true. It also has been the best year for how these bulls were developed. We have had better quality hay and we had enough old grass from last year that we turned these bulls out April 1st. They have been on grass ever since and have done amazingly well. They have been on a pasture rotation of 520 acres of grass. They have walked miles and miles and are fit and athletic. We have several new sire groups this year and are excited to have some sale features from some of our own sires represented. One of special interest is our top selling bull from our first sale we now call YT Revolver 7408. He has 2 sons in this sale that are exceptional. We have around 35 calves on the ground from Revolver and will be expecting around the same for next year. His heifers are excellent.

I am so thankful for everyone who has supported us over the years. It was very gratifying to see most everyone who bought a bull from the first sale came back and supported us again last year. To show our appreciation we have a unique customer loyalty program where we take 1% off your purchase for every year that you buy a bull from us.

I would like to personally thank everyone who has helped us along the way. Thanks to my parents for all the help with whatever we ask for throughout the year from chores to picking up kids. Thank you to all our neighbors and friends for all your help over the years. Finally, to all who we have ever received anything from in any way you have helped us get to where we are today, and I am forever grateful.

I encourage all of you to keep your focus on the things that truly matter in this life. This last year we have seen a lot of things and have faced a lot of challenges. From quoting my first sale speech "With God on our side all things are possible". So put your faith in God he has got this. A wise man told me some great advice and it has helped me through a lot of things and that is, "Pray, Hope and Don't Worry". We are the most resilient people in the world, and we will make it through whatever lies ahead!

May God Bless You, and May God Bless America!

Jonathan

Lodging

Comfort Inn - Mandan, ND....701-751-7484

A block of rooms have been reserved at the Comfort Inn & Suites in Mandan for Friday and Saturday. Please mention YellowTop Angus when you call to get a reduced rate if reserved by November 18th. If calling in after November 18th please ask for the Yellowtop Angus room Rate if rooms are still available.

Lunch

Please join us for a complimentary lunch before the sale starting around 11:30.

Liability

YellowTop Angus assumes no Liability for accidents or Injuries that occur on sale day.

Customer Loyalty Program

We are continuing our Customer Loyalty Program. Our Loyalty Program is: 1% off your total purchase per year you buy.

Example: Buy for 20 yrs. – get 20% off. So if you are feeling healthy and live to 100 your bulls are free.

End of Sale Bull Discount Drawing

All Lot #'s will be put into a hat and 2 will be drawn out. The buyer of the 1st lot # drawn will get 5% off that lot, and the 2nd lot # drawn will get 10% off.

Cattle Viewing

Anytime before the sale by appointment and sale day.

Sale Terms and Conditions

Payment is due on sale day. Bulls will not be released until payment is made.

Herd Health

The bulls have been on a full vaccination and a deworming program. We guarantee these bulls to be reproductively sound.

Delivery

Immediately after the sale we are offering free delivery on all bulls sold within a 300 mile radius. Receive a \$50 discount per bull if you haul your own on sale day.

Retained Interest

YellowTop Angus is retaining 1/3 interest in every bull unless noted in foot notes.

SALE ORDER IS CATALOG ORDER

PLEASE BRING SALE CATALOG WITH YOU TO THE SALE.

BULL DEVELOPMENT AT *YellowTop* ANGUS

I am excited this year because I feel we are starting to get our bull development figured out. Each year I am learning from the past and doing the best I can with what I have for developing our bulls. These bulls were calved on grass and developed there through weaning. They had 2 rounds of shots and were dewormed and poured prior to weaning. We weaned and brought the bulls home and pitched grass hay morning and night and hand fed them their developer pellets at night. We started out at 4 pounds and over the winter got them up to 8 pounds. We turned them out into small pastures around our place, to ensure they got good exercise and brought them up to the barn to feed at night. Then April 1st we boosted the vaccines and turned them out on cool season pastures. We rotated them there until the summer and turned them out on 320 acres of native grass. We have supplemented them this summer with pellets and I feel their condition is about perfect. We developed these bulls on 15 acres per bull for the summer. I feel that the less confinement, the less cement, and the less corn a breeding bull has the better chance they will have to stay in your herd for a long time. We feel that we are doing the best we possibly can, to offer you sound bulls with good dispositions and developed in a way to make your investment last as long as it can. In doing so we hope these bulls will sire you good calves for years to come. There are so many factors that we can't control on how long a bull lasts. The factors that effect a bulls longevity that we can control, we are striving to implement into our program.

YellowTop INDEXES

Again this year we are implementing our Indexes for Calving Ease, Performance and Maternal.

With 1 being low and 10 as good as it gets.

Our calving ease recommendations are 1-4 cows only 5-6 cows or larger framed heifers that will get checked 7-10 cows and all heifers.

After working on the YellowTop Indexes, and getting customers input over the years on EPD's and Weights, we decided to come up with the most comprehensive tool we could. This index looks at everything, even the traits that not many others are evaluating. We call these the Cowboy's EPD's. Traits under the Maternal Index like how the cow acts at calving to how quickly the calf is up and going are weighed into the score.

For the Calving Ease Index we look at history of the Cow Families and their ratios and the physical make up of the bulls head, shoulder and size of hoof. For the Performance Index we look at environmental and weather factors, available forage and quality of forage and water as well as carcass info, just to name a few. I will be happy to explain the entire scoring system to you if you would like further information on it.

Thanks

Jonathan

Reference Sires

ROUGH RIDER

Roughrider has been an exceptional herd sire for us. Producing excellent females and true beef bulls. His sons in this sale will be the last that we ever offer. We have chosen to continue on with some of his best sons out of our top cows.

NEXT GENERATION OF ROUGH RIDER SONS

The next sires were bulls that we used as yearlings and then sold in our 2018 sale. They were all bulls out of top cows that I felt would breed some stronger traits and consistency into our herd. If you believe in what you're doing, I feel that you can produce bulls to meet the goals of your breeding program from within. I am so happy with these calves out of the 4 bulls that I used from within our own program.

7438 is the sire of lots 1-4.

Revolver is the sire to lots 5-6.

7417 is the sire of lots 19-23.

7412 is the sire of lots 24-32.

REVOLVER

Revolver was the High Selling bull from our 2018 sale. He is an exceptional individual that will be on display sale day. We are excited to have 2 solid sons to offer in this year's sale. Lots 5 & 6 are great all-around angus beef bulls. Last year we flushed 2 of our best cows to him and got 24 embryo calves, and 15 natural calves that look really good. Revolver was first turned out in April this year and breed through September covering three different groups. When we pulled him at the end of September he still looked as good as the day he was turned out. I pulled him off cows and loaded him by myself in a pasture with no corrals or panels, he just followed me into the trailer with a bucket. He is truly a gentle bull. He has great length, above average muscling, good depth of body, and a great Angus head. With Thunder and Density close in the pedigree and the famous Madame Pride Cow family I feel Revolver will be a cornerstone of our program for the bulls and females that he has been producing.

NINE IRON

Nine Iron is an outside sire that we bought from Hoover Angus to add even more maternal traits into our herd. We call him Nine Iron because he has 9 pathfinders stacked in his pedigree which is impressive and hard to find, and his dam is out of Gridiron who is known for producing great females. His dam is one of the best cows to ever walk the pastures from one of the Nation's oldest and best cow herds. He was an embryo calf and one of three of the last offspring that his Dam ever produced. She excelled in performance, maternal and carcass traits and lived until 14 years of age. Nine Iron had a full brother that sold for \$30,000 and went to a bull stud. He had great feet, good length and was a good all-around Angus bull at 8 years of age. Our bred heifers that are mates to these bulls look like they will be amazing females. His EPD's put him in the top 3% of the entire breed for maternal traits. Unfortunately, we lost this bull last year due to a career ending injury, so we have selected sons to continue his legacy.

Calving Ease: 3 Performance: 10 Maternal: 8

Lot 1 is a bull that will add muscle, depth of body and performance to your herd. He is an impressive individual and was the heaviest bull of the entire calf crop at weaning. He is out of the Madame Pride cow family and his Tombstone dam is the top ratioing weaning weight cow of our herd with 5 calves at 114. She became a donor cow last year.

Lot 2 has been an impressive calf since branding time. He is an attractive bull with good Angus character. 9445 is extra long with above average muscling and has a nice head. A very well-balanced bull with a good disposition. He was tied for the 6th heaviest bull at weaning time. He did all this with just a 78 lb. birth weight and should be a performance calving ease bull for medium to larger heifers.

Lot 5 is the first Revolver to be offered for sale! He is a great one. He has the frame, length, depth, and muscle to run with the best of the bulls. This bull has no holes and is out of a great proven cow. His Dam is 9 years old. She has been a very fertile cow with 7 calves born 364 days apart and every calf has been good. I saw her very first bull calf that she had this summer at a customers house and he looks fantastic at 7 years of age. 9408 was the 4th heaviest bull at weaning.

Performance: 9 Maternal: 8

Lot 6 is a very complete bull. He is the number 2 bull for weaning weight. 9421 was a twin and born at just 63 pounds. He has done exceptional and is a well-balanced bull that is hard to fault in any area. His mother had the Lot 2 bull last year and has had 6 calves born 361 days apart and has a weaning ratio of 105. 9421 is very similar in type and kind to lot 5. These 2 bulls could go any where in the country and compete for quality and consistency. I feel they will make a lasting impression for the operations that buy them.

Calving Ease: 4 Performance: 8 Maternal: 9

Lots 7-11 are original Roughrider flush brothers. Here is a unique opportunity to buy 5 flush brothers that are backed by the great Erica cow family. Their dam was 14 when we flushed her and has 12 calves with a weaning ratio of 99. She has six daughters in our herd, and we have sold many bulls out of her in past sales. Throughout her life she maintained fantastic feet, and Ideal teat and udder quality and to top it all off she was a pathfinder cow. Lots 7-11 should work in any operation, and under any condition. They are easy fleshing bulls with above average muscling and longevity bred in. These will be the last original Roughrider sons we will ever sell. These bulls are embryo calves and were not ratioed against the other bulls, therefore their ratios will be 100. I am going to be retaining half interest and half possession on lot 9.

Calving Ease: 4 Performance: 8 Maternal: 9

Lot 12 is the first Nine Iron son to sell. He is a good one. 9404 is larger framed and has good length. He is one of the first bulls to come up and rub on you in the pasture. He is also an embryo calf and is out of a great cow. His mother is one of our thickest and deepest cows that we have and yet she is feminine fronted. There has been good longevity in this cow family with Lot 12's dam being 8 years old and his granddam raising a calf every year until she was 16 years old. This bull should sire some great females. Since he is an embryo calf and was not ratioed against the other bulls, therefore his ratios will be 100.

Calving Ease: 6 Performance: 6 Maternal: 9

Lot 23 is a maternal gem. His mother is a great cow we purchased from Montana. She is 12 years old and has one of our best heifer calves at side this year. She has 10 calves at 101 for weaning ratio. 9461's make is that of a heifer bull and his 1.3 birth weight EPD would indicate calving ease but his actual birth weight was 87 so I would only recommend him for larger heifers.

Lot 24 is an amazing bull. His Law Dog dam is one of the best all-around young cows in the herd. She is moderate framed, easy keeping, long sided, with a neat and tidy udder. Her famous Primrose cow family is another plus. She has had her first 3 calves 341 days apart and was one of the early calving cows again this year. This calf was a stud last year from birth to branding and through weaning. He is so complete and balanced with no holes. From the ground up and front to back I can't fault him. I have decided to sell 1/2 possession and 1/2 interest in this great Individual. I would like to raise more females like his mother. I feel moderate sized cows that keep their flesh, produce above average calves, and breed back consistently in real ranch conditions with minimal inputs are the ones that will help a ranch be profitable in any market. We will winter this bull and deliver him when you need him and we would like to use him starting August 7th.

Lot 25 is another good one. These 7412 calves are good. His mother is a great Extra daughter out of the Madame Pride cow family. She has had 6 calves with a weaning ratio of 105. She is one of the lead cows of the herd. She is a great mother and has a super calf again this year. Like lot 24, lot 25 is hard to fault. He has exceptional length and above average muscling. He is a lot like some of his brothers who have been High selling bulls in previous sales. These are the fun ones to raise because they can go anywhere in the country and will do well. He is suitable for heifers and will add performance and maternal. A complete package.

Lot 26 is a solid 7412 son. It is hard to write foot notes on this group because they are so consistent. You have to get picky to sort them. This bull should add udder quality with his dam having a great udder. She is very feminine fronted and has a top bull calf at side this year. Lot 9441's dam is off to a good start with 4 calves at 103 weaning ratio. His build and EPD's show him to be a calving ease but he had a 86 pound birth weight so I would just use him on larger framed heifers.

Lot 27 is one of the surest calving ease bulls with eye appeal. This is 0445's last calf and she went out in style. She lasted in the herd until she was 10 years old. This good old Madame Pride slowed up milking at the end and that effected his weaning ratio. When he started on feed at weaning he picked right up and now runs with the rest of the bulls for size and weight. He has a great disposition and will mature into a solid herd bull.

Lot 28 is a beef bull that is wide topped, has a crest on his neck and is out of a great 12 year- old pathfinder cow we bought years ago in Montana. He has good thickness and length of body and has looked like a bull since birth. Lot 28 has great Angus Character. His dam has 10 calves at 107 and has a nice heifer calf at side again. It is hard to find bulls like this with longevity bred in and no holes. With all this he is even suitable for larger heifers with a 80 pound birth weight and a negative birth weight EPD. His dam has typically had a bit more birth weight in her calves, so he is not across the board calving ease.

Calving Ease: 4 Performance: 5 Maternal: 7

Lot 31 is another more maternally bred bull. His dam is the cow that should have a long career. Her dam was 16 when we got rid of her and she had a calf every year on time. 9448's dam has never produced calves that blow you away, but they are balanced and have been good for our customers. This cow just gets better with age and has had her best calf this year at 6 years old.

Calving Ease: 10 Performance: 6 Maternal: 10

Lot 32 is a unique bull with a great personality. He is gentle and curious and likes a good head scratch. 9455 is a calving ease bull with a -2 on birth weight and has a CED of +12. His moderate framed, nice uddered Law Dog dam is a great 4 year old cow working in our herd. I chose to end the sale on a good note, I like this bull. He has good thickness, is an easy keeper and will work in any environment. His younger brother is one of the nicest calves in the pasture right now and looks to be a sale highlight in next years sale out of Revolver.

Lot 32

Thank You

May the road rise to meet you.
May the wind be always at your back.
May the sun shine warm upon your face.
And rains fall soft upon your fields.
And until we meet again,
May God hold you in the palm of his hand.
